Part III DETAILED ACTION

Claims 1-17 are currently pending.

Election of Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a)). The following election of species is hereby required for the initial search for examination on merits:

The claims are generic and/or individually dependently directed to a plurality of disclosed patentably distinct species of method steps, such as insertion of various active domain sites, as well as timing of the insertion step. Consideration of methods involving these steps requires a separate burdensome literature search, as well as addressing separate patentability issues. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for the particular timing of insertion (from those in claims 3,4), and type of active site (from those in claims 7-9).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable

Art Unit: 1631

over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).
